AMONG THE FARMERS.

"SPEED THE PLOW." The Spirit of the Woods.

There comes a song from the long, dream locke hills,
Now velied in soft mist of green,
Where wild flowers blush in their blossoming
And the winds blow fresh and keen;
New growing things stir with sound as of rain,
Now joyful, now hushed and sad,
But the spirit of earth in burgeoning
Is young and her whispers glad. There soars a pæan of wild winged notes
From a tree grown gaunt and old
Whose heart has been socrebed by the sting of

Those heart has been and fire fire Yet stands undismayed and bold;
Yet stands undismayed and bold;
Inviting it spreads wide its green budded arms
Fulfilling its destiny,
In springtime and summer, autumn, and death,
Brave is the soul of a tree.

—Mabel W. Phillips. Oxford Farm Bureau Activities.

SOME OF THE WORK UNDER WAY FO PRESENT SEASON.

Judging by the reports of county project leaders read at the Oxford Farm Bureau executive committee meeting

with tractor, cuts 65 tons of hay, leader, there were May 1 enrollments with tractor, cuts of tons of hay, numbering 262, not including the memare resumed. What is removed from the bership of the junior garden clubs at food in the purifying process which the Rumford. There are 32 club leaders in milk supplies? once. For price and terms inquire of the county. Two new projects, room There is a class of disorders known a improvement and bee culture, have been "deficiency diseases", so called because taken up this year, Oxford being the they appear to be due to deficiencies i only county to have a bee club.

The crops leader, A. L. Sanderson of Waterford, reported that 101 farmers in beri-beri, and possibly rickets and pella the county are enrolled in the lime gra. Scurvy has been known for centudemonstrations, an increase of 34 over ries and was common among sailors in last year's enrollment. More than 350 the days when long voyages were more tons of lime have been purchased co- common than now. Fundamentals of Cooperative Farming (By Lloyd S. Tenny.) Reports from over 6000 farmers' cooperative associations doing a total business of approximately half a billion dollars annually have been compiled by the United States Department of Agriculfeatures of cooperation are not thoras the leaf buds show green one-eighth oughly understood. What, for instance, to one-quarter of an inch. The other forare the functions of cooperation; what mulas are for either spraying or dusting, are its fundamentals; and what are the forms which the cooperative effort ods, which are designated as follows:

should take?

Marketing implies the rendering of such essential services as assembling, grading, processing, transporting, storing, financing and, finally, distributing the product. The functions of cooperals have fall ative marketing are the performance of weeks later. hese services, or such number of them as conditions may require, efficiently and economically for the benefit of the associated producers. Price-fixing or monopolistic control of the product, are not functions of cooperative marketing, and recommended in each formula are given and has appointed the town of Casting an attempt to include them in this cate- in detail. Copies of the circular will be

gory must fail.

The fundamentals for cooperative success, as they have been assembled from studies of successful and unsuccessful organizations by the United States Department of Agriculture, are briefly There must be a well defined object in

The sixth fundamental of successful cooperation is an informed membership.

If a farmers' movement is to succeed it will do so because of the interest and support of the farmers. They will support of the farmers and mulches the support of the farmers. They will support of the farmers and mulches the support of the farmers. They will support of the farmers and mulches the support of the farmers.

as officers and directors those men among its members who are the clearest thinkers and possess the best business

judgment.

If these fundamental principles ar kept clearly in mind, the form of organzation is of secondary consideration Any form of organization which recognizes and provides for these principles has in it the elements of success. A form-of organization based on local units will prove most successful when there are local services to be performed, or outlays of capital to be made at 16cal

Vitamins. (By Dr. L. H. Merrill.) For many years food chemists have been accustomed to think of foods as

consisting essentially of proteins, fats, carbohydrates, mineral salts, and water. t has been assumed that an adequate diet could be made up of these alone provided that they were supplied in sufficient amounts, in proper proportions, and in palatable forms. Within a few years evidence has been rapidly accumulating which tends to show that an adequate diet must include a sixth class of foodstuffs, the vitamins. Some of the reasons for believing this are: When young rate are fed upon a mix-ture of the five food stuffs first named, supplied from ordinary sources, they make good growth, breed normally, and are apparently in good health. When, however, the proteins, fats, and carbohydrates of the food are carefully purified, the growth of young animals is checked, and they display very evident signs of defective nutrition. If a very small allowance of milk is now added to the diet, normal growth and functions

the diet. Among these may be named scurvy, Barlow's disease, xerophthalmia

it is an organic compound and that it is Vitamin A. This is termed the growth-

vitamin, its absence inducing scurvy or It now seems probable that a number

The Governor and council of Maine has established a new rule in connection with the auditing of bills for freight that is shipped to the various he slipped on a banana peel on the state departments and institutions. It is expected that from \$8,000 to \$10,-000 a year will be saved to the state Already there has been saved \$6,973.79 on refunds on freight and the state's

Nelson Gamache, a farmer living on the West mountain, Adams, Mass., tells of an adventure in the woods near the Bellows Pipe Trail, where he says he was attacked by a wildcat. He says he was returning home along the lonely road when the huge cat orn, but he finally ing off the animal. Announcement of the spring con-

struction and maintenance program of the Boston and Maine railroad revealed that the expenditure of \$12,-500,000 has been authorized for such work this year, an increase of \$1,000,-000 over last year. It is planned to lay 20,000 tons of ran and 1,250,000 belt, covering Granville, N. Y., Poultnew ties, to balast 100 miles of track and to reconstruct some of the large than 6000 men will be employed in

Carl M. Bigelow of Boston, an industrial engineer and a lecturer at Harvard and the Massachusetts Institute of Technology, declared at Pawtucket, R. L, that there is no reason why wages of mill employees cannot be increased 25 per cent if the manufacturing heads of mills would instruct their employees concerning

Jimmy Currie, 14, of Enfield, Me. got so angry with his 18-year-old brother, Chester, that he fired charge of birdshot at him. Chester was well peppered about the legs and in one hand. This was brought out in the Municipal Court. Chester said his brother fired low and did not mean to kill him, he thought. Jimmy on charge of assaidt with intent to kill, was held in \$1000 bonds which

his mother and aunt furnished and took him home. Prof. Frank Schlesinger, directo f the Yale Observatory, in an addess before the Sigma Xi Society, said a devise was being perfected at the observatory by means of which photographs of certain stars may be taken at night automatically when these stars pass before the telescope. The use of the photographs, he explained, is for the determination of variations in latitude at a given point, which science has decided

eaches a maximum of 40 feet. The Maine Lumbermen's Association voted to appeal to the Interstate Commerce Commission for a reduction of freight rates on round edged humber over New England railroads, after a committee reported that Maine Central, Boston and Maine and Grand Trunk railroads refused to make such a reduction. The lumberien assert that this type of lumber s extensively used in box making and that the freight rate is now so high that it frequently happens that although this is the cheapest grade used in boxes, the tariff exceeds that

The reduction in the toll of lives tuberculosis is one of the outstanding examples of the value of reventive therapy, declared Dr. Edward O. Otts of Boston, president of the Massachusetts Tuberculosis Leaque, speaking at the Massachusetts health conference at Springfield, Mass. The speaker said that in Massachusetts, a highly industrial state, the mortality from all forms of tuberculosis has been reduced from said "smart" I thought you referred 179.8 per 100,000 of population in 1910 to personal appearance.—Boston

MANNERS AND THE 'PHONE According to This Writer, the Instrument Is Responsible for a Num-

ber of Delinquencies. J. M. Keyes opened a topic of wide interest when he proposed a code of

telephone manners. This is nothing less than a yearning for perfection. It cannot be achieved, and before telephone manners in their present state are condemned it is best to consider social advantages which the telephone offers. The invitation nuisance which stirs Mr. Keyes to the depths of his being is not so unbearable as the nuisance who brings his invitations with him and sits down to argue with you about er of the State in February with 1072 it. The one who wants to know why pounds of milk and 61.53 pounds of you cannot come when you tell him butter fat according to report of the | that you cannot is very difficult to get Ayrshire Breeders' Association. She rid of. On the other hand, it is exis 10 years old and this is her best ceedingly easy to say: "Well, good-by," and hang up at the first opportune pause. Moreover, the telephone is a great encourager of those who are timid in their lying. One can look into the little black hole where the transmitter is and tell any sort of whopper, when the words would die on his lips if he were faced by an inquisitor. Furthermore, a man who is well and hearty can safely say that he is suffering agonies with headache when

the other party to the conversation As for the difficulty of thinking up

Louis R. Sweatland of Springfield, Mass., was awarded \$1,000 in superior court for damages he suffered when sidwalk near the Springfield Public

Market. He sued the market. When the citizens of Biddeford, Me., voted on daylight saving at a special freight bills amount to approximately election they made certain a perplexing problem of clocks for the summer months. All the industrial plants and the Biddeford-Sacco street railway will operate on daylight saving, while the schools and other activities in the control of the city will remain on standard time.

Tech seniors took first steps toward sprang at him. He received several capitalizing the youth of their class deep soratches and his clothing was for the benefit of technology. Nearly June signed \$250 endowment fund insurance policies, issued by a Boston concern, which will become payable in 1948. In the way the class, on the 25th anniversary of its graduation, will be able to make a gift to Tech of more than \$100,000.

A strike in the "sea green" slate ney and Fairhaven, Vt., which would yards at Boston and Ayer. More was averted by a compromise. The men demanded an increase of 10 cents an hour in pay, making 60 cents. They refused an offer of five and announced their intention to strike. A compromise was effected at seven cents advance. Nine companies were involved.

A warning against misguided activity in regard to popular education was sounded by Dr. Augustus O. Thomas, Maine state superintendent the kind of work they do, point out of schools, in an address of welcome their own values ,and bring about co- at the convention of the New England ordination between the sales and Association of Colleges and Secondary Schools, Portland, Me., in which he ex tended "a genuine New England hospitality.' Dr. Thomas also warned against "any propaganda which will tend to set up in this country, among our children, common and preferred classes." The tendency to select the 5 per cent. of superior mentality as college entrance," he said, "is a false theory and the back wash of the caste ucated few to be known as an educated

> whicharistocracy in America." The Pacific Mills, Lawrence, Mass., will sell at cost 5000 shares of their stock, on the installment plan, to employees of their plants in that city, that is at \$91 a share, according to an official annuncement today. Each worker may make application for from one to five shares. If more than 5000 shares are sought, those apportioned to each plant will divide pro rata among those applying, so that, if possible each employe who wishes may receive at least one share. The stock will not become the property of employes until fully paid for. but dividends declared in the interim will be credited to accounts of pur-

- Here and There.

We have all wanted to know, for lo these many years, just where the Garden of Eden was situated, and to visit it, if tle boys visited at Carl Hatch's, Bridgton, for a few days. Lester Allen and family have possible, just to get a taste of the apples raised there, which seemed to have had more fuddle to them than any little pale into Mrs. Ezra Lebroke's rent. vellow three-sided cider apples ever grown in the state of Maine; also to get a whack at any snakes that might be there, just for what their primal ancestor did to Mother Eve. By the way, can it be supposed that snakes and cider apples had anything in common in the days of Adam and Eve? They do now; but one generally partakes of the apples, or the juice thereof, before he sees nakes, which reverses the Bible story. But speculation aside, there is a ma who thinks he knows where this original Supper and dance at Odd Fellows' Garden of Eden was situated. That Hall, North Waterford, Monday evening, man is Professor Sir Arthur Keith. In a recent lecture before the Royal Society supper at 6 o'clock, Shaw's Orchestra of London, he said that sandy waste the dance at 8:30. Sahara, and the little less sandy waste of Arabia, with the country lying between that and far-off Mongolia somed like the rose in the olden days It man was driven out by a ffaming fiaming sun he placed in heaven. Every having been called to Connecticut to see type of man could be found around this his uncle, who is not expected to live long. Mr. and Mrs. W. E. Littlehale were in garden spot; and all the individuals which are associated with antiquity,-Abraham and Tubal Cain—pale into in significance in the million of years back

FIRST OF GREAT SEAFARERS Vikings May Be Said to Have Pos sessed Truly Uncanny Knowledge of the Ocean.

The Vikings were not only great warriors, but they were equally distinguished as maritime explorers. "They were so vigorous in their activities, so dauntless and daring, such genuinely strenuous shipmen, that they were bound to do great things, or fail where none could have succeeded," said El. Keble Chatterton, in "Ships and Ways of Other Days." And Doctor Nansen reminds one that "they had neither compass nor astronomical instruments, nor any appliances of our time for finding their position at sea; they could only sail by the sun, moon and stars, and it seems incomprehensible how for days and weeks, when these were invisible, they were able to find their course through fog and bad weather. But they found it, and the open craft of the Norwegian Vikings, with their square sails, fared north and west

over the whole ocean. It was not till

500 years later that the ships of other

nations were to make their way to the

same regions."

How to Make Shoes Last Longer. The soles of shoes can be made to last much longer if ordinary varnish is applied to them. When the shoes are new, or have just been resoled, apply the varnish to the soles. Allow an interval for drying, and then give them a second coat. When this has ecome hard, give them still another coat. The whole operation will not take very long, as varnish dries more quickly on leather than it does on wood. Be quite sure that the varnish is set before attempting to wear the shoes. After a few days the varnish tain many of the old time names, but will wear in certain places on the lots of "Fords" are coming in and pay soles, so that it will pay to touch these spots up again and leave them overnight. The application of varnish has the additional advantage of making leather absolutely waterproof. For this reason it is a good plan when putting on the varnish to put a little on the part where the upper joins

> the sole. Abuse Generally Reacts. I never yet heard man or women much abused that I was not inclined

FULL COURT SUSTAINS DECISION OF

CHIEF JUSTICE CORNISH. A rescript handed down from the law court on Friday in the equity suit of William O. Frothingham vs. Frank F. Woodside declares that William O. Frothingham received a plurality of all the ballots cast for sheriff of Oxford County at the state election in September, 1922, and is therefore entitled to the

At that election Mr. Woodside was the Josephal, where she has been for a week Republican candidate for sheriff, and Mr. Andrews.

Mr. Frothingham was the Democratic candidate. The returns from that elec-tion as made by the town officers showed a total of 5002 votes for Woodside and 4990 for Frothingham. The governor and council accordingly issued a certificate of election to Mr. Woodside, who became sheriff the first of January.

was brought by Mr. Frothingham, alleg-ing that certain ballots which should have been counted for him were not so Mr. and Mrs. Leslie Lee Mason, who have been on a European trip for the past two months, have been in Paris for the past two weeks. They were to sail for America on the France May 12th.

Ing that certain ballots which should have been counted for him were not so counted. A hearing was held before Chief Justice Leslie C. Cornish at Augusta, Dec. 9. On the 12th of Jan uary Chief Justice Cornish filed his uary Chief Justice Cornish filed his decision decision decision decision. The Frothington of Mrs. Trothington of the regular meeting Tuesday were made.

Star, at the regular meeting Tuesday evening. A supper was served at 6:30, and following the meeting there was an entertainment comprising orchestra music, vocal solos and readings.

It is of interest to be the regular meeting Tuesday evening. A supper was served at 6:30, and following the meeting there was an entertainment comprising orchestra music, vocal solos and readings.

On Monday members of Oxford Chaplecision, declaring Mr. Frothingham elected, he having received 5000 legal votes to 4995 for Mr. Woodside. From this decision Mr. Woodside appealed to the full bench, which met to consider the matter some time in March. The Auxiliary fair, which was to be ciate Justice Albert M. Spear, states that held May 17, has been postponed indefinitely because of illness. The regular

Learn the Knack of Baking Custards. How often do you serve baked custard? Is it one of your frequent des-serts, or something which you make only occasionally because you are never quite sure how it will turn out? It is true that too often the baked custard served falls far below the standard. The reason that the baked custard is such a stumbling block to so many housewives may be traced to one of two

than they are. Not only are they easy to prepare—which is, we all admit, a big point—but, more important still. they are nutritious if properly made, For this reason they are often given to invalids and children and will prove a boon to the mother who finds it difficu

to get her patient or her children to take eggs or milk.

The two chief ingredients of a custard are eggs and milk, and it is the proportion in which they are used which deter mines the consistency of the custard, for it is the coagulation or thickening of the proteins of the eggs which thickens the custard. So, unless sufficient eggs are used, the custard will not "set. Institute experience has shown that one egg to one cupful of milk is the correct proportion if individual custards are be ing made, while six eggs to one quart of milk are necessary if one desires to make one large custard. The other ingredients—the sweetening and flavoring—are a matter of taste, and so may be varied to suit the individual preference.

The actual preparation of the baked custard is simple in the extreme. For individual custards to serve six, break four eggs into a bowl and beat slightly Long beating is not necessary, for th eggs are used as a thickening agent and not to lighten the mixture. Next, add one-fourth cupful of sugar and one-half easpoonful of salt and mix well. To this mixture then add slowly one quart of milk and stir all together. Flavor with one-half teaspoonful of vanilla and mix thoroughly.

Soften a little butter with a wooden

spoon, and with a piece of crumpled tis sue paper grease lightly, but well, six custard cups. By buttering the custard cups, it is possible to unmold the custards with ease. Now pour in the cus tard mixture, filling the cups to within about one-quarter inch from the top. If desired, a few gratings of nutmeg or bit of coconut may be sprinkled over the top of each. Place the cups carefully in a shallow pan containing about one-half inch of warm water. The custards are Custards are one of the hardest things

to bake properly. However, with a little care, even an amateur may secure per fect results. In order to secure a cus tard which is firm enough to set and a the same time is smooth in texture, it i absolutely essential that it be cooked temperature low enough to prevent its ooiling. For it is high temperature which curdle egg and milk mixtures. s for this reason that they are placed i a pan containing water. Place them an oven which registers 325° F. and bake about forty minutes, being sure that the emperature of the oven does not go any nigher. Then test the custards to see they are done.

The heat, of course, penetrates to the

enter last of all, so test the center of the custards lightly with the tip of the finger to see if they are firm, or test with a silver knife—the latter method being more generally accurate. First, dip the center of the custard. If it comes out clean, the custard is done, but if the blade of the knife is coated, further cooking is necessary. A custard which is cooked too long will whey off, so as soon as the knife comes out clean, re move from the oven and cool at once by setting in a pan of cold water. When very cold and firm, turn out of the molds and serve. Custards may be served in a variety of

ways. They are delicious plain, but if desired they may be served with sliced. fresh fruit such as oranges or bananas or with berries. A pleasing change is to serve them with sweetened, thickened fruit juices or with a caramel sauce. For one large custard allow six eggs to

minutes, or until done. For Caramel Custard place eight table poonfuls of sugar and one-half cupfu f water in a saucepan and cook quickly without stirring, until the sirup become brittle when dropped in cold water. Pour immediately into a dry mold or pudding dish, shaking the mold well to coat the entire inner surface. Break four eggs, reserving the whites of two and beat well. Scald one pint of milk pour over the eggs, beating all the time

LAMB KIDNEYS AND BACON.

Soak lamb kidneys in salted water for n hour, then cook in boiling water five inutes. Be careful not to overcook. fake a sauce from one quarter cup of outter and two rounding tablespoons of lour; cook until quite brown, then add 1.2 cups of rich stock and cook five minutes. Season with onion juice, catsup or table sauce, salt and paprika. Cut the kidneys into small dice, heat and serve garnished with crisply fried

SALT PORK AND CREAM SAUCE. Cut some salt pork into thin slices and frop into boiling water; set aside for five minutes, then drain and roll in flour. leated dish. Pour into the pan and on to the fat one-half cup of cream and one-half cup of milk. Add a level table-spoon of flour made smooth in a little cold milk. Cook five minutes and pour

LEMON CREAM PIE. Mix two level tablespoons of cornstarch with one cup of powdered sugar and pour on one cup of boiling water, cool, add the juice and grated yellow rind of one lemon and one beaten egg. Pour into a paste lined plate and bake. WHOLE WHEAT BREAD.

Dissoive one-half yeast cake in onealf cup of lukewarm water. Put two inps each of boiling water and scalded milk into a bowl and when nearly cool add the yeast and four cups of whole wheat flour. Beat well, adding enough white flour to make a dough that can b kneaded. Knead well, let rise, knead again for ten minutes and shape into four loaves. Let these rise light and

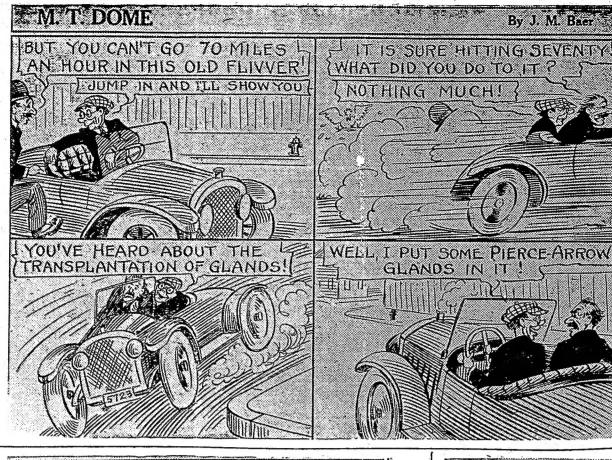

When Cleaning Silver-When cleaning liver, either plated or sterling, apply he silver polish and then clean the silver with soft, crepe paper napkins. The result is remarkable. Glasses and all crystal ware can be polished into bril-liancy with a few rubs from the paper apkin, after being dried with a cloth. White Silk Stockings-White silk

tockings grow yellow and soiled-lookng even with the most careful washing, nd if kept from summer to summer are insightly. I buy a good quality of fully in lukewarm water and soap. Then in the fall I gather them all together and e them in a good dye for winter use.

When Hemstitching by Hand-When hemstitching, wrap a piece of colored paper around the index finger, sewing it together. Use this when working the hemstitching, for the fine threads are easier to see, and it does not tax the

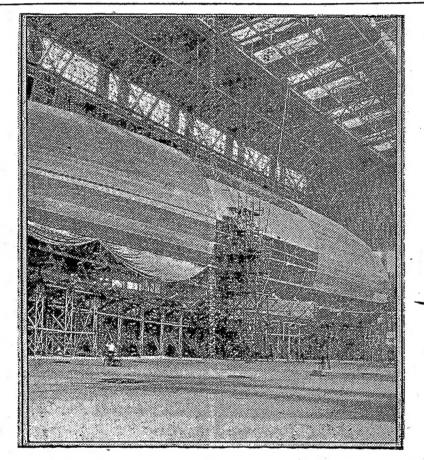

In Poaching Egga—It has occurred to me that you might be interested to know that if a pan is well greased with bacon or other fat before the water is put into the pan, the eggs to be poached therein will not stick to the pan even it the water is quite shallow.

AUST SUBMIT TO TATTOOING amoan Youth Not Considered a Man Unless He Has Been Thoroughly "Decorated."

On the island of Tutuila, one of the waves the "Star-Spangled Banner. Pango Pango, the harbor of this beau-

a child is an occasion for rejoicing. fete is held. The father invites all his friends. The mother invites hers. Then there is a regular exchange of presents. The men present gifts to the women. This is followed by feastng and dancing.

A Samoan girl is considered a woman the day she marries, which is at a very early age. But a boy has to go through more of a process than that of simply marrying before he is proclaimed a man. And the process is so painful that he does not attempt to alone. He gathers around him his young friends of the same age. They set out together for the tattooer. To complete the job of tattooing boy from the waist to the knee—which

is the correct thing in Tutuila-two months are required. When his body is beautifully decorated with interesting designs he is a man.

TIGERS YIELD MANY CHARMS Natives of Indo-China Make Many Uses of the "Lord of the

The teeth and claws of a tiger are sed by the natives of Indo-China as good-luck charms, watch charms, o necklaces, and the teeth are used to cure dog bites. They are filed down and when the powder thus secured is dissolved in water, it is an infallible remedy, they believe. A remarkable belief is that if one makes a cigarette holder out of the canine tooth of a tiger that has eaten a man, one can see the image of the victim, its completeness depending upon the degree to which the smoke has colored the tooth. The natives carefully clean and macerate the nerves of a tiger in alcohol The resulting brew is an elixir of long life. If one eat tiger's liver or tiger's heart, one's courage in battle will know no bounds. Among the Mois, after a tiger has been cooked, its skull and lower jaw are broken and the pieces buried separately, to keep the lord of the jungle's ghost from bringing disturbance and disaster upon the inhabitants of the village. The whiskers the teeth, and the claws are very much sought after. Ground into fine dust and dissolved in water, the whiskers make a supposedly virulent poison.

His Neighbor's Good.

see all Creatures everywhere full of their Delights. The Birds are singing; the Fish are sporting; the Fourfooted are glad of what they meet withal; the very Insects have their Satisfactions. 'Tis a marvellous Display of infinite Goodness. The Good God has made His creatures capable of Delights; He accommodates them with continual Delights. . . :

Well; is there no way for me resemble and imitate, this incomparable Goodness of God! Yes: I see my Neighbors all accommodated with heir various Delights. All have some, and some have many. Now, I may honestly make their Delights my own. I may rejoice in the Delights, which I see the Goodness of God bestowing in his Diary, March 12, 1700.

Poet's Cheer. One more royal trait properly be ongs to the poet. I mean cheerfulness, without which no man can be a great poet, for beauty is his aim. The true bards have ever been noted for the stockholders of the Pythian Building their firm and cheerful temper—Association, for the election of officers for the Brick School.

Homer lies in sunshine. Chaucer is glad and erect, not less sovereign and cheerful is the tone of Shakespeare.—

Emerson.

Mass.

To the Honorable Court of County Commissioners for Oxford County, Maine,—Your petitioner, Bertis L. Whitman, of Woodstook in said County, respectfully represents that; upon petition of Lewis M. Mann and Edwin J. Mann, addressed to the Municipal way to begin at the premises of Frank whitman officers of said Woodstock, to lay out a private way to begin at the premises of Frank whitman premises of said Whitman to Redding, and ending at the land of Lewis M. Mann and Edwin J. Mann said private way to be over the old loration of the discontinued road to Redding, the Municipal officers of said Woodstock met at the Town Hall in said Woodstock on December 24, 1921, and on said December 24, 1921, the said Municipal officers laid out said way as above described; that at a special meeting of the Inhabitants of Woodstock held January 9, 1922, the said inhabitants of said town accepted said way as laid out; that your petitioner is interested as being owner of land over which said way is laid out; your petitioner says that said way is laid out; your petitioner says that said way is laid out; your petitioner says that said way is laid out; your petitioner says that said way is laid out; your petitioner says that said way is laid out; your petitioner says that said way is laid out, your petitioner says that said way is laid out, your petitioner says that said way is laid out, your petitioner says that said way is laid out, your petitioner says that said way is laid out, your petitioner says that said way is laid out, your petitioner says that said way is laid out, your petitioner appeals to this which we way is laid and of said Edwin J. and Lewis M. Mann, without recourse to said way as laid out by said Municipal officers.

Wherefore your petitioner appeals to this Court and prays that this Court may review the proceedings as taken, and act as provided for by Revised Statutes of Mathue, 1916, Chapter 24, and acts additional and amendatory thereof.
